

Arthrex Launches Online Learning Tool for Orthopedic Patients

(NAPLES, Florida – Sept. 4, 2024) – Arthrex, a global leader in minimally invasive surgical technology and medical education, is pleased to announce the release of [OrthoPedia Patient](#), an interactive digital platform that provides patients with access to easy-to-understand videos covering a comprehensive range of orthopedic conditions and treatments.

OrthoPedia Patient encourages a self-directed educational journey through the following topics:

1. A general overview of orthopedic anatomy and pathologies
2. A patient-friendly explanation of various treatment options
3. Surgical animations of the latest techniques
4. Surgical technique videos of cutting edge, least invasive techniques demonstration (for optional viewing).

"OrthoPedia Patient was created as part of our long-standing commitment to medical education and our mission of Helping Surgeons Treat Their Patients Better[®]," said Arthrex President and Founder Reinhold Schmieding. "This comprehensive website provides health care professionals and patients understandable educational resources when navigating the most common orthopedic conditions, injuries and treatment options as surgical technology rapidly evolves."

Your browser does not support the video tag.

All OrthoPedia Patient content is developed by clinical specialists, who are experts in their fields. Content is peer-reviewed by health care professionals, making OrthoPedia *Patient* one of the few peer-reviewed orthopedic resources for patients on the Internet. The platform will be continuously updated every week to reflect the latest orthopedic research, digital education and treatment standards.

"Our goal is to make OrthoPedia the most advanced and complete online medical education platform available to healthcare professionals and patients around the world," said Senior Vice President of Medical Education, Christopher Adams, MD. "The launch of the patient-facing website is a critical milestone in achieving that goal."
