

Arthrex Strengthens Commitment to Joint Preservation Through Partnership with ICRS

NAPLES, Fla., Sept. 22, 2026 /PRNewswire/ -- [Arthrex](#), a global leader in minimally invasive surgical technology, announced a partnership with the [International Cartilage Regeneration & Joint Preservation Society \(ICRS\)](#), building on a long-standing collaboration and strengthening efforts to advance cartilage restoration and joint preservation worldwide.

"Joint preservation plays a critical role in helping patients maintain mobility and function. Arthrex is committed to advancing the technologies and clinical education that support surgeons in delivering innovative joint preservation solutions," said Jake Jolly, Arthrex senior director of knee and hip arthroscopy product management.

As a Diamond Partner of ICRS, Arthrex will support the society's educational activities, scientific meetings, surgical skills training and collaborative initiatives that promote knowledge-sharing and professional development within the global joint preservation community.

"We are very excited about this future partnership and look forward to innovative new initiatives growing out of this commitment," said Christian Lattermann, MD, ICRS President 2025-2027.

The collaboration comes as Arthrex continues to expand its joint preservation portfolio. Recent advancements include the launch of the ChondralTak™ technique, the first cartilage fixation device to be introduced to the market in 23 years, and patient-specific instrumentation for knee osteotomy.

Alongside its expanding portfolio of joint preservation technologies, Arthrex provides educational resources for patients through [KneePreservation.com](#) and for healthcare professionals at [JointPreservation.Arthrex.com](#).

Together, Arthrex and ICRS will continue fostering education, scientific exchange and innovation in cartilage repair and joint preservation to help improve patient outcomes worldwide, fulfilling the Arthrex mission of Helping Surgeons Treat Their Patients Better®.

About Arthrex

Arthrex, headquartered in Naples, Florida, is a global medical device company and leader in multispecialty minimally invasive surgical technology innovation, scientific research, manufacturing and medical education. The company has pioneered the field of arthroscopy and sports medicine and develops more than 1,000 new products and related procedures annually to advance patient care across orthopedics, trauma, spine, arthroplasty, cardiothoracic, and numerous other surgical specialties and biologic technologies. Arthrex also specializes in the latest 4K multispecialty surgical visualization and OR integration technology solutions. For more information, visit [Arthrex.com](#).

About International Cartilage Regeneration & Joint Preservation Society (ICRS)

The International Cartilage Regeneration & Joint Preservation Society (ICRS) is the main forum for international collaboration in cartilaginous tissue research and joint preservation. Recognizing that there is a continuum from cartilage injury to degenerative joint disease, the Society brings together basic scientists, clinical researchers, physicians, other

healthcare professionals and members of industry, engaged or interested in the field of articular biology, its genetic basis and regenerative medicine. The Society currently has more than 1000 active members from 65 countries.

ICRS seeks to improve our patients' quality of life, decrease their disability, and reduce the impact of degenerative joint disease on health-care systems worldwide by preserving joints and maintaining function. For more information, visit cartilage.org.
